Award Winner – iDEA 2007 Design Collaboration category

For the second time in twelve months, Cambridge Design Partnership (CDP) has won an award for its ability to bring forward commercially successful and exciting new products and technologies.

This latest accolade comes in the form of an award organised by Cranfield School of Management and industry magazines Eureka and New Electronics and is called the Innovation and Design Excellence Awards.

CDP beat off stiff competition to win the Design Collaboration Award which recognises that "...personal ingenuity, intellectual property and problem solving are critical skills and assets."

The award also takes into account expertise in a particular branch technology, a willingness to take calculated risks and evidence of products that are successful in the market.

CDP Directors Mike Beadman and Mike Cane accepted the award on behalf of CDP at an award ceremony in London.
